

Why rent a home? You can take advantage of rent to own housing here at ShortPropertySales.com and avoid the typical rent headaches. There are many advantages of rent to own homes compared to paying rent:

1.

You build equity with every payment you make in a rent to own housing arrangement. Unlike rent; your payment actually goes towards purchasing the home and that is a much better financial benefit compared to a standard rent arrangement.

2.

Long-term housing. In a rent to own home you have a long-term housing solution. You will not need to move in a year or two years. Instead you have a place you can truly call your own. Moving is expensive and time-consuming. By using our rent to own homes you can avoid the entire moving headache.

3.

Sense of community. In a rent to own home you are a homeowner that has a stake in the local community. Your long-term rent to own housing can help you to take more control over your local community, schools, taxes and much more.

Rent is a good solution for some people but a smarter option is to own and build equity through a rent to own home agreement. Are you ready to find a rent to own home instead of just paying rent every month? Get started with your rent to own housing search by completing the form below. Our housing specialists will contact you to discuss available rent to own homes in your area and price range.
